 - Tools: vscode, MySQL
-

PROJECTS

- **Project 1: Weather App** – using **ReactJS** [\[LINK\]](#)
→ Using this Project, one can get current weather details as data is fetched using the open weather app API and is displayed on the web.
 - **Project 2: Desktop Voice Assistant** – using **Python** [\[LINK\]](#)
→ It aims to assist users using voice-based commands as it is beneficial for differently abled people providing less interaction with the system.
 - **Project 3: Portfolio Website** – using **HTML, CSS and JS** [\[LINK\]](#)
→ Displays information about users and is responsive.
-
